SHARADHA SHIVAKUMAR

Software Engineer | Backend | Full-Stack

sharadhashivakumar04@gmail.com | Sunnyvale, CA | LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Software engineer with 3 years of experience building scalable, fault-tolerant backend and full-stack systems in Go and Java on Kafka, Cassandra and Kubernetes, focused on data pipelines, microservices and production reliability.

EXPERIENCE

Walmart Global Tech Apr 2025 – Present

Software Engineer (Contract) Sunnyvale, CA

- Build scalable backend microservices in Go and Java (Spring Boot) for a large-scale e-commerce platform, with REST and gRPC APIs.
- Develop high-throughput, event-driven pipelines on Kafka that write to Cassandra, Memcache and BigQuery, tuning data models and partitions for read/write performance.
- Cut service latency by moving blocking work to async paths and consolidating downstream calls; added retries and backpressure.
- Containerize services with Docker, deploy on Kubernetes, and maintain CI/CD with Jenkins and GitHub; perform code reviews.
- Build Prometheus and Grafana dashboards and alerting; own releases end to end, from load testing to post-release monitoring and on-call.
- Build agentic AI developer workflows with MCP servers and CrewAI; use Cursor, Claude and Copilot daily in Agile/Scrum.

One Community Global Oct 2024 – Apr 2025

Software Engineer Remote, CA

- Developed MERN features for the Highest Good Network app, including a personalized recommender (+25% engagement).
- Built a RESTful API to identify deactivated users and flag their final week of contribution for accurate reporting.
- Fixed 10+ UI/UX issues and reviewed 40+ pull requests in a global team of 100+ developers.

Cognizant Technology Solutions Aug 2021 – Apr 2022

Programmer Analyst Trainee Chennai, India

- Automated Microsoft Dynamics CRM workflows with JavaScript and C# plugins, cutting manual data entry by 40%.
- Tracked and resolved issues in Jira, contributing to 30% faster issue resolution.

PROJECTS

Job Recommendation System · Flask, Pyomo, BERT, Sentence Transformers May 2024

- Built a job-matching platform combining 4 ML models with Pyomo optimization; raised accuracy from 28% to 98%.

Enhancing Fire Safety · Python, Q-Learning, A* Search Dec 2023

- Led a team of 3 building an AI escape-route planner (Q-Learning + A*) with 97% accuracy on fastest exits.

Dynamic University Website · Angular, Spring Boot, Docker, AWS Nov 2023

- Containerized and deployed a university website on AWS with a Spring Boot REST API, cutting page load time by 45%.

Flight Operations Management System · Java, Android, JDBC, Oracle SQL May 2023

- Built an Android app and 16-table Oracle schema for multi-airport flight operations.

SKILLS

Languages: Go, Java, Python, JavaScript, TypeScript, SQL, C#
Frameworks & APIs: Spring Boot, Node.js, Express, Flask, React, Angular, Microservices, REST, gRPC, Protobuf
Data & Messaging: Kafka, Cassandra, Memcache, MongoDB, Oracle SQL, BigQuery
Cloud & DevOps: Kubernetes, Docker, Jenkins, CI/CD, AWS, GCP, Git/GitHub, Prometheus, Grafana
AI & Tools: MCP, CrewAI, Cursor, Claude, GitHub Copilot, BERT, scikit-learn, Pandas, JUnit, Postman, Jira, Confluence

EDUCATION

George Mason University · M.S. in Computer Science May 2024

Coursework: Software Design & Architecture, Database Systems, Software Testing, Data Mining, Reinforcement Learning

Rajalakshmi Engineering College, Anna University · B.E. in Computer Science & Engineering May 2021
